

noizezz

listen with care

Noizezz hearing protection is the result of years of intensive research and product development. Speech intelligibility and invisibility when wearing noizezz has been leading it.

Highest quality

The quality of noizezz hearing protection is unparalleled. This is due to the unique, patented filters and by clever design.

You feel barely that you are wearing hearing protection and they are virtually invisible to the outside world.

About noizezz

Noizezz is part of Multi Care Systems: since 1976, a specialist in the development of tools for the hearing impaired. In 2007 we started with the development of noizezz hearing protection.

Since 2009 noizezz are universal and custom-made hearing protection available.

There is an ongoing research into the optimization of the combination of noizezz filters with sound systems for musicians, DJs, car drivers and pit crew.

the best
invisible
protection

Why is hearing protection necessary?

Hearing damage occurs from 80 dB. When you consider that a concert has an average noise level of 90 dB to 130 dB, then you know you really cannot do without!

You can get hearing damage if you are at arm length removed from the noise and you have to shout to make yourself understood.

Sound passes through the outer ear to the cochlea. That's where the cilia puts sound into electrical impulses to your brain. Loud noise damages the cilia. This is why you can hear a ringing noise if you were in loud noise for a long time. The cilia can recover, but this is unfortunately not always the case. So is hearing initially not.

What can noizezz do for me?

Noizezz helps prevent hearing damage. You can choose from several kind of hearing protection which will damp sound to a greater or lesser degree. There is hearing protection you can use immediately and hearing protection custom made.

Therefore, go to a hearing care professional (auditory store). Read all about the different situations and different types of filters in this brochure

17^{dB}

Noizezz for peace and quiet

You actually hear no one complaining, but a lot of people are affected by noise at home and on the go. Are you bothered by noise from household appliances, aircraft engines or noise from the neighbours?

Noizezz Purple brings you a sea of tranquillity::

- Mild attenuation
- Also comfortable during prolonged use
- Virtually invisible when worn

flying, noise from neighbours and traffic

30^{dB}

Noizezz on the motorcycle

All motorcyclists know: that beautiful noise of the engine and wind noise can cause hearing damage. It is one of the reasons why even a short ride can be very tiring. At 50 mi/h you have about 90 dB noise around you and at 75 mi/h even 98 dB.

Hearing damage already occurs from 80 dB!

Noizezz Orange is developed for the specific needs of motorcyclists and has the following properties::

- Strong attenuation
- Does not protrude out of the ear, won't touch the helmet
- Comfortable on long rides
- Guaranteed perfect fit if custom made
- Available with customized communication system

Noizezz Orange motorcycling, DIY (electric) tools
Attenuation up to 30 dB

33^{dB}

Noizezz in the construction industry

Who works in the construction is obliged to wear hearing protection, but also those who are doing a bit of DIY should wear hearing protection. Demolition, drilling, grinding, sanding you develop hearing damage before you know it.

Red Noizezz protects your ears against the heaviest noises:

- Heavy attenuation (up to 33 dB!)
- Virtually invisible when worn
- Custom made with useful extras such as an 'approach' or a lanyard so you do not lose your hearing protection

Noizezz Red, heavy industry, construction, fireworks

Attenuation up to 33 dB

16^{dB}

21^{dB}

Noizezz for musicians

Are you a professional DJ or a musician who likes to play with in-ears? Consider Noizezz P3RFX. A custom made earplug with a perfect fit, comfort and suppression of external noise.

Especially for musicians, with separate filters designed with the following Features:.

- As flat as possible attenuation
- Musical nuances remain audible
- Different filter levels

Noizezz MF Low 16 dB Attenuation

Noizezz MF High 21 dB Attenuation

How much attenuation do the filters give?

Noizezz filters are really different from the familiar yellow foam plugs you sometimes see. Through years of research we managed to create filters that keep you well protected and still you will be able to have a conversation.

Attenuation at key frequencies

Your ears are most sensitive to sounds around 4000 Hz and least sensitive to very low tones. Especially between 2 kHz and 4 kHz (the area where most consonants are heard) hearing you must be well protected. hearing you must be well protected. In the graph on the right you can clearly see that the filters give exactly the protection needed.

Noizezz for everyday use

Noizezz Universal Plug & Play

Especially for anyone who occasionally goes to an event, there are noizezz Plug & Play.

Hearing protection with a noizezz filter and a universal fit - it fits in each ear!

You can continue to understand each other perfectly and the clever design makes the hearing protector virtually invisible.

Noizezz for watersports

At the request of satisfied users of hearing protectors there are noizezz earplugs for water sports enthusiasts. With no noise reduction, but with the same unprecedented comfort.
